

I am a Caring Thinker!

I like listen carefully to what is being said. I agree and disagree with ideas and am open to changing my mind about what I think. I show respect for the speaker by making eye contact. I show empathy for other people and persevere with my thinking and work, even if it is hard.

Cwtch

Creative Claude

I am a Creative Thinker!

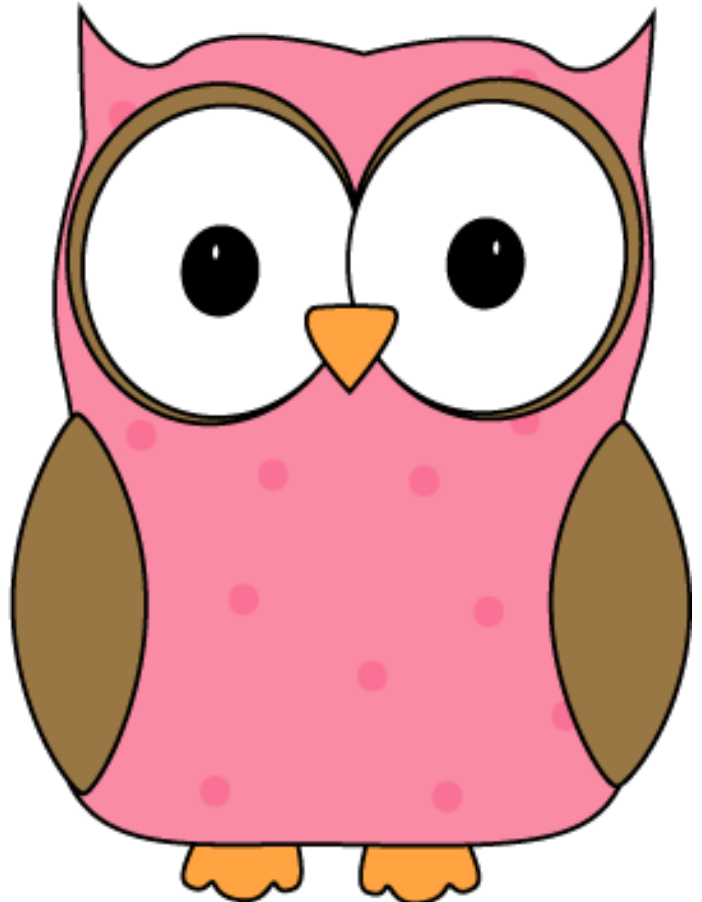

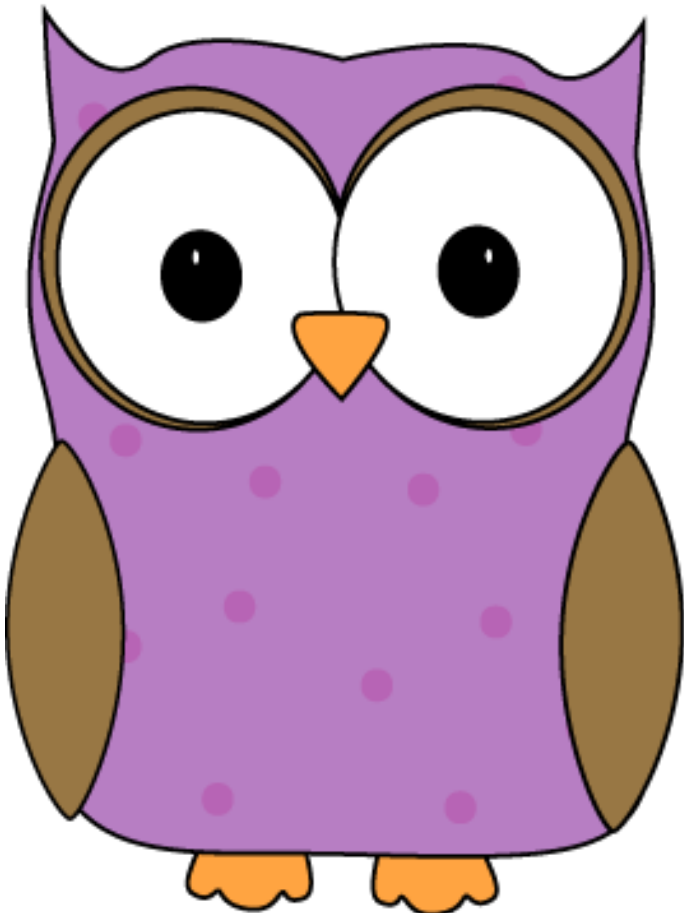

I love to give examples to support my ideas and ask 'what if...?' questions. I can suggest alternative ways of thinking and make connections between ideas and reasons. I can think about different ideas to the same question.

We are the Collaborative Thinkers!

We are keen to share our ideas or opinions and encourage others to share their ideas by smiling and thanking others for their contributions. We like to give everyone the chance to talk and talk to each other not the teacher! We respond in a friendly way to ideas different to our own. We link our ideas to the ideas of others.

Collaborative Carl and Carla

I am a Critical Thinker!

I enjoy asking 'big' questions and giving good reasons for ideas. I love to draw distinctions between ideas, that is identify similarities and differences. I ask for clarification and give counter examples and arguments. I think about the progress we have made in our enquiry and try to create definitions for big ideas. I might start to spot assumptions as well!
